July 2011

Dear Birdshot Chorioretinopathy Specialist

### **BIRDSHOT CHORIORETINOPATHY RESEARCH NETWORK**

Following a meeting of patients and professionals in September 2010, a Birdshot Research Network has been established, led by Miss Narciss Okhravi and supported by Mr Carlos Pavesio, Mr Mark Westcott, Professor Miles Stanford, Professor Andrew Dick and Professor Phil Murray.

A priority list for research has been established by patients and professionals and the BRN is attempting to get this research underway, hold a data base of all research into Birdshot, focus on next steps in research and support anyone undertaking research into Birdshot.

The inaugural meeting of the BRN will be held on 18<sup>th</sup> October 2011 at the Birmingham & Midland Eye Centre (hosted by Professor Phil Murray).

If you are interested in undertaking research or are already involved in a research project or trial, or have an interest in the outcomes of trials, we would welcome your attendance at this meeting.

Could you please let us know ASAP if you would be interested in attending, as space is limited, so we can provide you with more details, and ensure we fully cater for you.

Best regards,

Rea Mattocks and Annie Folkard  
Birdshot Uveitis Society
